# Geocache Trail

**You are a servant of Lord Robert Henley Ongley,  
3rd Baron of Old Warden.**

As one of his trusted servants you have been given the important task of compiling the final guest list for the grand opening party of The Swiss Garden.

There is one small problem though – you have lost some of the guests' replies! You need to track down the missing information in order to avoid a social disaster.

## **Taking part**

You will need either a dedicated GPS device or a smartphone with a GPS app installed to help you fulfil your mission.

If you wish to do so you can create a free online geocaching account (see website below) to log your finds.

The trail starts with eight virtual caches, located throughout the garden, plus four physical cache boxes which reveal the names of the missing party guests. The physical caches can be found in the garden and the surrounding woodland, and also contain a stamp press to fill in the spaces overleaf.

**Good luck and happy hunting!**
